

Rural Water Movement

Saturday and Sunday, September 19 & 20, 2020

8:30 am to 4:30 pm both days

Rural water movement is a reality for Fire Departments in West Virginia. This class is a review and discussion of techniques for supplying water in rural areas. The class will include a lot of hands on training with multiple scenarios. This is a good review and practice for veteran firefighters, and an excellent opportunity for firefighters who have not experienced water shuttle operations.

South Berkeley VFD
