INSTRUCTIONS TO THE MONITOR/EVALUATOR

Candidate shall be provided with the following:

1. Minimum of one additional Fire Fighter
2. Charged hose line
3. Walkie talkie
4. Tools

INSTRUCTIONS TO THE CANDIDATE

The student shall be able to properly demonstrate how to suppress an interior grade level structure.

Minimum PPE: Full PPE and SCBA

PERFORMANCE

		YES	NO
C	1. Wears full protective equipment and SCBA properly.		
	2. Properly advances hose line from one of the following loads: Minuteman Load Pre-connected Flat Load Triple Layer Load		
C	3. Clears remaining hose from hose bed and flakes out hose line before entering.		
	4. Maintains communication.		
	5. Enters structure properly (per building's condition).

Candidate shall be provided with the following:

1. Fire Apparatus
2. 2 ½" fire hose

INSTRUCTIONS TO THE CANDIDATE

"The student shall be able to properly demonstrate the ability to do a horseshoe hose load."

Minimum PPE: Gloves

PERFORMANCE

		YES	NO
	1. To set up for a forward lay, the student places the male coupling in hose bed first at rear corner. To set up for reverse lay, the students places the female hose coupling in hose bed first at rear corner.		
	2. Lay first length of hose on edge against either wall of hose bed.		
	3. Makes a fold even with rear of hose bed.		
	4. Lays hose back to the front and around inside of hose bed so it approaches rear along opposite wall of hose bed. Makes fold at rear of hose bed. Lays hose back around edge of hose bed inside first length of hose.		
	5. Continues to lay hose around edges of hose bed. Each fold of hose will take up decreasing amount of space in inside of horseshoe.		
	6. Once the center of horseshoe is filled in, the student begins second layer by bringing hose from rear of hose bed and laying it around perimeter of hose bed.		
	7. Completes additional layers using same pattern as was done for first layer.

1. Fan (Smoke Ejector) 2. Window or door opening	
INSTRUCTIONS TO THE CANDIDATE	
"The student shall demonstrate the ability to properly ventilate using positive pressure."	
Minimum PPE: Structural FF PPE and SCBA	
PERFORMANCE	
	YES NO
1. Determines the location of the fire within the building and the direction of attack.	
2. Places the fan 4' to 10' in front of the opening to be used for attack.	
3. Provides an exhaust opening at or near the fire. This opening can be made before starting the fan or when the fan is started.	
4. Checks for interior openings that could allow the products of combustion to be pushed into unwanted areas.	
5. Starts the fan and checks the cone of air produced. It should completely cover the opening. This can be checked by running a hand around the door frame to feel the direction of air currents.	
6. Allows smoke to clear – usually 30 seconds to one (1) minute depending on the size of the area to be ventilated and smoke conditions.

1. (ALL ROLLS) Running during the evaluation.	
<i>Straight Roll</i>	
2. Rolls male coupling in to protect.	
3. Lays roll down and tamps exposed coils.	
<i>Donut Roll – Method One:</i>	
4. Starts roll approximately 5' – 6' from center toward male coupling.	
5. Rolls toward female coupling.	
6. Ends with sufficient hose (approximately 3') to fold over and protect male coupling.	
<i>Donut Roll – Method Two:</i>	
7. Hose laid flat.	
8. Starts at a point off center about 6' toward the male coupling.	
9. Starts roll towards the female coupling.	
10. Ends with sufficient hose (approximately 3') to fold and protect male coupling.	
<i>Twin Donut Roll:</i>	
11. Places couplings together.	
12. Hose laid flat without twisting, forming two parallel lines from the looped end.	
13. Starts roll from looped end by folding loop over and upon parallel lines.	
14. Rolls toward couplings forming twin rolls.	
<i>Self-Locking Twin Donut Roll:</i>	
15. Places couplings together.	
16. Hose laid flat without twisting, forming two parallel lines from the looped end.	
17. From 2' – 3' from the end, moves one side (up and over) to opposite side, creating a loop.	
18. Faces couplings and brings distal end of loop and places it where the hose crosses.	
19. Starts roll at crossed hoses, rolls toward the couplings and forms twin rolls.
